

IGC Track Upload

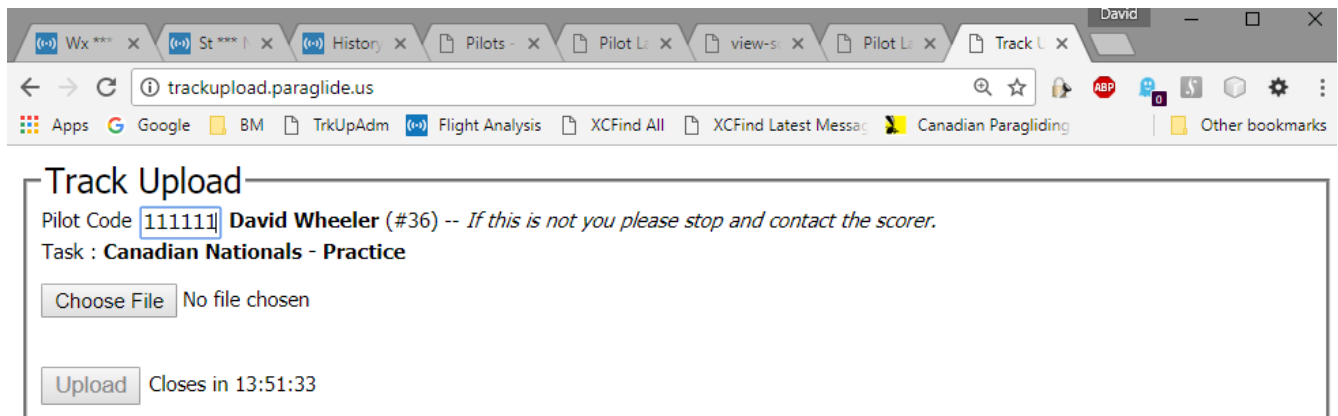

You have three options to get your tracklog in to be scored each day:

- Stand in line and have the scorers get your tracklog from your instrument. (boo)
- Drop your instrument off in the dropoff box and pick up later. (ho hum)
- Generate your own IGC file and upload to the TrackUpload website. (yay)

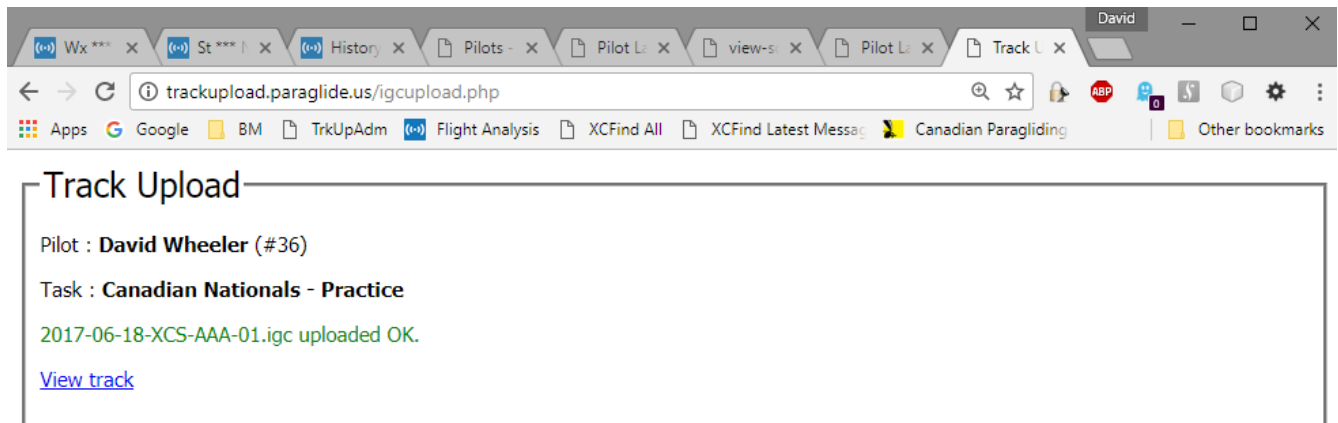

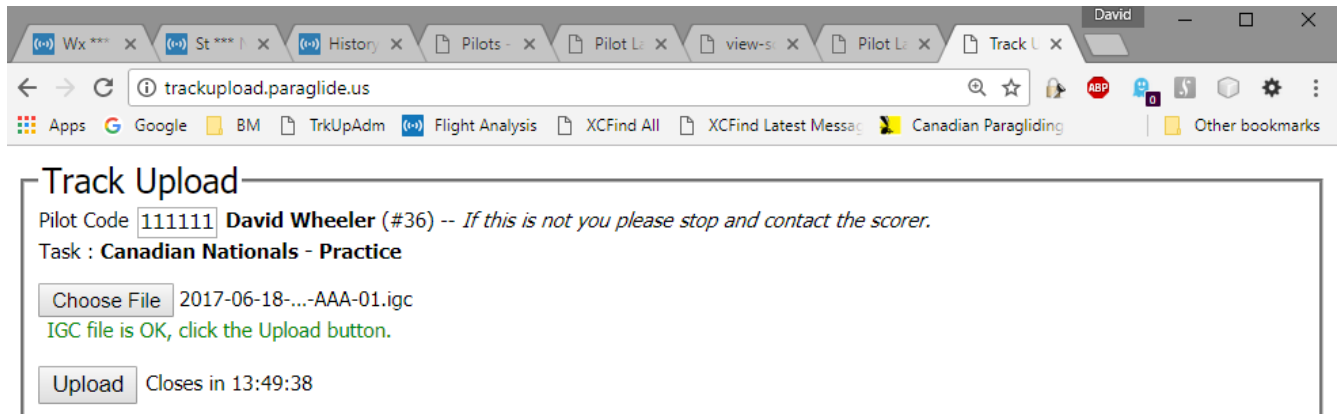

The website is : trackupload.paraglide.us

You will need a six character pilot code from the scorer.

Choose the IGC file from your laptop folder and click 'Upload' to send to the server.

You can click the view track to display the track on a map of the task to make sure you uploaded the correct IGC file.

This is not the official score for the track, that will be done by the scorer.
